

Andrew Beaver – Software Developer

Halifax, Nova Scotia, Canada

(902) 579-0285 | andrewbeaver@live.ca | <https://www.linkedin.com/in/andrewbeaver-software/>
<https://www.andrewbeaver.dev/> | <https://github.com/andbeaver>

Software developer with industry experience building full-stack, mobile, and cloud-based applications. Currently seeking part-time opportunities alongside my studies at Dalhousie University.

Projects

MedMinder | Cross-Platform Mobile Application Personal Project

Dart, Flutter, SQLite, Codemagic CI/CD, App Store Connect

- Developed a cross-platform medication refill reminder app with a team of three, with on-device SQLite storage for offline functionality and full data privacy.
- Led Flutter project setup, designed the Prescription data model, and implemented CRUD functionality for managing medication schedules.
- Built the home screen and add/edit forms as the user interface for prescription control.
- Published to the Apple App Store, managing the full submission and review process.

Diabetes Direct | Full-Stack Web Application Academic Project

React, TypeScript, Vite, Java, Spring Boot, PostgreSQL, Stripe, Spring AI, Docker, Azurite

- Built a full-stack e-commerce simulation for diabetes supplies using React + TypeScript and a Java/Spring Boot backend with PostgreSQL.
- Integrated Stripe Embedded Checkout with server-side cart validation, prescription enforcement, and insurance-based pricing before payment.
- Built AI customer support using Spring AI, grounding a local LLM in the live product catalog with conversation memory and a per-session frontend chat widget.
- Applied production practices throughout: TypeScript type safety, externalized credentials, optimized JPA fetches, and HTTP status-aware exception handling.

TicketHive | Full-Stack Web Application Academic Project

C#, ASP.NET Core MVC, React, Node.js/Express, SQL Server, EF Core, Azure Blob Storage

- Built a cloud-deployed ticketing platform with an admin portal, customer React app, and secure Node.js/Express API.
- Implemented authentication, CRUD operations, and Azure Blob Storage image handling in the ASP.NET Core portal.
- Developed a multi-step purchase workflow in React with validation, reusable components, and dynamic routing.
- Designed a relational database schema and optimized SQL joins and environment-based configuration across services.

MealWave | Cross-Platform Mobile Application Personal Project

Dart, Flutter, Codemagic CI/CD

- Built a mobile app implementing the Warsaw Method to calculate insulin recommendations for complex meals for those with Type 1 Diabetes.
- Created a time-based insulin-to-carb ratio scheduler with editable, auto-sorted entries and persistent storage.
- Designed a responsive, validation-driven UI with multi-screen navigation (calculator, history, ratio settings).
- Used Material 3 theming and implemented extended bolus duration calculations.

Additional Projects

WeatherPal (Android): Real-time weather app using Retrofit and WeatherAPI with GPS-based alerts.

Sentiment Analysis – Machine Learning (ML.NET): C# binary classifier with live retraining UI.

Humans' vs Zombies (C++): Object-oriented simulation utilizing polymorphism and inheritance.

Halifax Transit (Android): Real-time bus tracking app using Kotlin, Mapbox, and GTFS feeds.

Arrivio (Web): Hackathon commute-planning tool with real-time routing, Google OAuth, and Maps API.

Technical Skills & Experience

Languages: C#, Kotlin, Java, Dart, C, C++, Python, SQL, JavaScript, TypeScript, HTML/CSS.

Web & Backend Frameworks: ASP.NET Core MVC, Node.js, Express, Next.js, Entity Framework Core, Spring Boot, Spring AI.

Frontend & Mobile Frameworks: React, React Native, Flutter, Jetpack Compose.

Databases & Cloud: SQL Server, RoomDB, Azure Resources (Blob Storage, App Service, Entra ID, Static Web App), Docker, Azurite, PostgreSQL, SQLite.

Design & Architecture: Object-Oriented Programming (Inheritance, Polymorphism, Encapsulation), MVVM, MVC, Relational Database Design, GTFS Realtime Data, Asynchronous Programming, LINQ.

Tools & Systems: Git/GitHub, Linux (Bash/CLI), Vite, Mapbox SDK, Google OAuth, RESTful API, Agile Methodologies, Codemagic, Vercel, Microsoft Graph API, Hugging Face, Stripe, Unit Testing (MS Tests).

Education

Bachelor of Applied Computer Science Expected 2028
Dalhousie University | Halifax, NS

IT Programming Diploma – Honours 2026
Nova Scotia Community College | Halifax, NS

Business Administration Diploma, Marketing Concentration 2018
Nova Scotia Community College | Dartmouth, NS

Work Experience

NSCC – Nursing Faculty Capstone Jan – June 2026
Full-Stack Software Developer | Halifax, NS

CARE (Critical Assessment Record Entry) is a React/.NET nursing education platform built for NSCC nursing students to manage clinical simulation patients and student assessments.

- Owned Azure resource management and led all branch promotions and production deployments across two live environments; ran sprint meetings and weekly client demos throughout the development cycle.
- Built a full Authorized User Management system with role-differentiated views for admins and instructors, integrating invite, revoke, and user lookup via Microsoft Graph and Entra SSO.
- Delivered multiple clinical features including campus-scoped patient management, acute care vs. long-term care access restrictions, QR-code attendance verification, and a Doctors Orders workflow with student read-receipt tracking.
- Served as primary technical contact for an active penetration testing team; established testing processes, resolved production bugs, and authored a Microsoft Graph setup guide and onboarding documentation for the successor capstone group.

Castle Hall Alternatives Jan 2019 - Sept 2020
Due Diligence Analyst (Team Lead) | Dartmouth, NS

- Supported institutional clients with billions of dollars invested by conducting due diligence verifications, leading process improvements, and reviewing and activating hundreds of funds across multiple products.
- Led a verification project with a team of six analysts, reviewing 500+ investment funds under strict deadlines.
- Trained and mentored analysts in Manila, creating process documentation and performance metrics to support onboarding processes.
- Conducted due-diligence calls with global investment managers to resolve data discrepancies.

Additional Attributes

- Fluent in spoken and written French with French Immersion Certificate and DELF B1 certification.
