# Andrew Beaver - Software Developer

Halifax, NS | andrewbeaver.dev | andrewbeaver@live.ca | www.linkedin.com/in/andrewbeaver-software/

## Employment Objective

Software developer in the IT Programming program at NSCC seeking a Spring 2026 work placement to contribute to full-stack development of real-world software solutions. I bring experience building full-stack, mobile, and cloud-based applications through academic, personal and hackathon projects.

## Projects

### TicketHive | Full-Stack Web Application – Academic Project

***C#, ASP.NET Core MVC, React, Node.js/Express, SQL Server, EF Core, Azure Blob Storage***

- Built a cloud-deployed ticketing platform with an admin portal, customer React app, and secure Node.js/Express API.
- Implemented authentication, CRUD operations, and Azure Blob Storage image handling in the ASP.NET Core portal.
- Developed a multi-step React purchase workflow with validation, reusable components, and dynamic routing.
- Designed relational database schema and optimized SQL joins and environment-based configuration across services.

### MealWave | Cross Platform Mobile Application – Personal Project

***Dart, Flutter***

- Built a mobile app implementing the Warsaw Method to calculate insulin recommendations for complex meals for those with Type 1 Diabetes.
- Created a time-based insulin-to-carb ratio scheduler with editable, auto-sorted entries and persistent storage.
- Designed a responsive, validation-driven UI with multi-screen navigation (calculator, history, ratio settings).
- Added dynamic Material 3 theming and implemented extended bolus duration calculations.

### Halifax Transit App | Android Mobile Application - Academic Project

***Kotlin, Jetpack Compose, RoomDB, Mapbox Maps SDK, GTFS Realtime API***

- Built an Android app displaying real-time Halifax Transit bus locations using GTFS Realtime feeds.
- Integrated Mapbox for live bus markers, route shapes, and interactive map controls in a Compose UI.
- Implemented MVVM architecture with RoomDB to persist route selections and maintain session state.

### Arrivio | Full-Stack Web Application – Hackathon

***React, Vite, Node.js, Express, Google Maps API, Google OAuth, Azure, Notifications API***

- Built a commute-planning tool that notifies users when to leave their home with real-time routing, Google OAuth authentication, and location autocomplete.
- Led frontend architecture, state management, and Maps API integration while collaborating on backend endpoints.
- Coordinated a 4-person team using GitHub workflows and feature branching to deliver the MVP in under one week.

## Other Projects

**WeatherPal (Android):** Real-time weather app using Retrofit + WeatherAPI with GPS-based alerts.

**Sentiment Analysis – Machine Learning (ML.NET):** C# binary classifier with live retraining UI.

**Humans vs Zombies (C++):** Object-oriented simulation utilizing polymorphism and inheritance.

## Technical Skills

- **Languages:** C#, Kotlin, Java, Dart, C/C++, Python, SQL, JavaScript, HTML/CSS.
- **Web & Backend Frameworks:** ASP.NET Core MVC, Node.js, Express, Entity Framework Core
- **Frontend & Mobile Frameworks:** React, React Native, Flutter, Jetpack Compose.
- **Databases & Cloud:** SQL Server, RoomDB, Azure (Blob Storage/App Service), RESTful API.
- **Design & Architecture:** Object-Oriented Programming (Inheritance, Polymorphism, Encapsulation), MVVM, MVC, Relational Database Design, GTFS Realtime Data, Asynchronous Programming.
- **Tools & Systems:** Git/GitHub, Linux (Bash/CLI), Vite, Mapbox SDK, Google OAuth, Agile Methodologies.

## Education

**IT PROGRAMMING** **EXPECTED MAY 2026**

Nova Scotia Community College | Halifax, NS

**BUSINESS ADMINISTRATION DIPLOMA, MARKETING CONCENTRATION** **2018**

Nova Scotia Community College | Dartmouth, NS

## Work Experience

### ACCOUNT SPECIALIST | LIFETOUCH CANADA | AUGUST 2022 – JULY 2024

- Coordinated logistics and data workflows for 400+ schools annually, ensuring accurate scheduling and resource allocation.
- Ensured secure handling of all student and staff data by enforcing portal-based collection processes.
- Conducted post-event feedback calls and summarized findings for internal teams to improve operations.
- Maintained databases, calendars, and documentation to support high-volume scheduling and data integrity.

### DUE DILIGENCE ANALYST | CASTLE HALL ALTERNATIVES | JANUARY 2019 – OCTOBER 2020

- Supported institutional clients with billions of dollars invested by conducting due diligence verifications, leading process improvements, and reviewing and activating hundreds of funds across multiple products
- Led a verification project with a team of six analysts, reviewing 500+ investment funds under strict deadlines.
- Trained and mentored analysts in Manila, creating process documentation and performance metrics to support onboarding.
- Created and analyzed KPIs to assess team performance and guide process improvements.
- Conducted due-diligence calls with global investment managers to resolve data issues.

## Additional Attributes

- Continuously expanding expertise in diabetes technology, including insulin pump systems, continuous glucose monitoring and regulations through hands-on evaluation and industry research.
- Self-taught investor with knowledge of ETFs, brokerage platforms, and market indexes.
- Fluent in spoken and written French with French Immersion Certificate and DELF B1 certification.
